

Adding Images to your Home Page Slide Show

You can control what images are on the home page of your site from your **Home Slideshow** album. This album is located under Modules, Manage Pictures. Here, you should see a list of all the photo albums that are on your website. If you do not have a **Home Slideshow** album, please call or email customer service, and we will activate the folder for you.

Description:
1000 X 442 px

Show On Mobile Site

Show Album Date

Album Date:
April 25th 2014

Is Specialty (Used for website banners, faders, etc.):
 No Yes

Most Slideshows are various sizes. This means that the photos you upload to your slideshow will have to be a specific size. You can find the size your images must be by clicking on the **Edit Details** button of your Home Slideshow album. This information will be found in the **Description** of the album. Please note that the size is measured in pixels.

Please note that all images that are uploaded to the dashboard to be displayed on your website must be images that you have the rights to use or display. By uploading an image, you agree that you either own the image or have written permission or the necessary licenses to share and/or upload it.

1. Once your images have been correctly sized, select the **Manage Pictures** button on your **Home Slideshow** album.
2. Next, select the **Upload Pictures** button on the upper right hand side.

3. This will open a directory to your computer so you can choose the images that you want to display, and then upload them.
4. Once your images have completely uploaded, be sure to select the **SAVE** button at the top right.

Upload Pictures Done

Choose one of 3 easy ways to upload pictures

By uploading an image, you agree to the following terms:
I understand that by uploading this image, I am stating that I either own the image or have written permission or the necessary licenses to share and/or upload it.
